## INTRODUCTORY NOTE

In order to make available statistical information as soon as it is assembled, the practice of binding in parts the Biennial Report of the State Superintendent of Public Instruction was begun in 1924.

For the biennium 1950-1952, the following parts of the complete report are issued separately:

**PART I. SUMMARY AND RECOMMENDATIONS.**

This is a general review of the public school system along with recommendations for the consideration of the Governor and the General Assembly—published under title "North Carolina Public Schools".

**PART II. STATISTICAL REPORT, 1950-1951.** This part presents detailed data pertaining to the public school situation for the year 1950-1951.

**PART III. STATISTICAL REPORT, 1951-1952.** This part gives information for 1951-1952 similar to that in Part II for the preceding year.

TABLE I. POPULATION, MEMBERSHIP, ATTENDANCE

This table shows by race for each county and city school system of the State during 1950-1951: the estimated school population (ages 6-20, inclusive), average daily membership and average daily attendance both by level of instruction (elementary or high) and by sex.

The summary gives the population, membership and attendance figures for North Carolina along with a series of percentage calculations.

TABLE III. AVERAGE TERM IN DAYS, 1950-1951

This tabulation lists the counties which deviated in 1950-1951 from the State-supported term of 180 days, showing the actual term for each; then gives the average term for all North Carolina schools based upon a distribution of average daily membership.

All cities had a term of 180 days.

TABLE V. SUMMARY OF ENROLLMENT

This summary shows by race for 1950-1951: the enrollment by schools (codes a plus c plus d plus e) for all North Carolina administrative units; those enrolled in two or more schools within the same unit or system (pupils coded c), permitting the enrollment by units (codes a plus d plus e) to be obtained by subtraction; those enrolled in two or more units (pupils coded d); the net State enrollment (codes a plus e); those coming from other states (pupils coded e). The U. S. Office of Education desires only those pupils coded a—secured by subtraction.

This presentation illustrates the ambiguity of the term *enrollment*; there are four (4) sets of figures. Net enrollment reduced to average daily basis is called *average daily membership*; see Table I and Table III.

TABLE VI. COMPOSITION OF STATE ENROLLMENT

This tabulation puts together a series of data in an effort to determine the composition of net enrollment (a plus e) during 1950-1951 and to show—as probable losses—known, former pupils not entering school this year. The losses of Table IX represent children who enrolled and quit school during 1950-1951; the asterisks of this table indicate formerly-enrolled children who probably quit between two school years.

The sum of the four columns of this table will equal enrollment (a+e), as presented elsewhere.

TABLE VII. WHITE ENROLLMENT (a+e) BY YEARS

This summary shows by grades the net enrollment (a+e) in all white schools over a period of twelve (12) years. By noting the figures just above the heavy horizontal lines, one may determine the rate of progress through the grades: 80,002 pupils in first grade in 1939-1940 as compared with 26,196 in twelfth grade eleven years later.

With 80,002 as base, percentage calculations show a decreasing proportion of grade-a-year pupils, an increasing proportion of losses or retardation.

Comparison of percentages for previous years—also given—indicates improvement.

TABLE VIII. NEGRO ENROLLMENT (a+e) BY YEARS

This summary shows by grades the net enrollment (a+e) in all colored schools over a period of twelve (12) years. Note the figures just above the heavy horizontal lines to see the lack of normal (grade-a-year) progress through the grades: 66,677 pupils in first grade in 1939-1940 contrasted with 16,443 in eighth grade seven years later or 7,373 in twelfth grade eleven years later.

The percentage calculations use 66,677 as base to show proportion of pupils making grade-a-year progress and the reciprocal, or proportion of losses and retardation.

Comparison with previous years—also given—indicates improvement.

TABLE IX. ENROLLMENT, LOSSES, MEMBERSHIP BY GRADES

This tabulation—a summary of several tables—shows by grades and race during 1950-1951: the number of different pupils enrolled (a+e), the number dropping out of school or losses, membership on last day and the percentage of enrollment which quit school during the year.

See Table VI for probable losses between two school years.

TABLE XI. MEMBERSHIP AND PROMOTIONS BY GRADES

This tabulation shows by grades and race for 1950-1951: the membership on last day of school, the number of pupils promoted—permitting the number not promoted to be obtained by subtraction—and the percentage of membership which was promoted.

The losses of Table IX are eliminated in this percentage calculation. A tabulation giving percentages based upon enrollment (a+e) follows.

TABLE XII. RELATIVE ACCOMPLISHMENT OF PUPILS  
BY GRADES

In an effort to measure the holding and promoting achievements of county and city school systems, this presentation divides the net State enrollment (a+e) into percentages, showing by race for each grade during 1950-1951: (1) the percentage dropping out of school, (2) the proportion promoted and (3) the percentage not promoted.

TABLE XIII. EXPERIENCE RATINGS OF TEACHERS

This summary gives the experience ratings for 1950-1951 of those teachers paid from the State Nine Months' School Fund; vocational teachers and those paid from local funds are excluded. Since only 12 increments were allowed on Graduate certificates, 11 on Class A, 6 on Class B, etc., the experience shown is not the actual number of years taught but the number for which there was compensation.

Classified principals and supervisors are not included; see following table.

TABLE XV. TRAINING OF TEACHERS AND PRINCIPALS

Based upon certificates shown in budgets, this summary gives for 1950-1951: the number of State-paid teachers and principals—divided according to types of certificates—the proportion at each level of training and an index number. Vocational teachers and those paid locally are excluded.

Classified principals are shown separately but are included in the index.

TABLE XVI. SALARY SCHEDULES FOR TEACHERS AND PRINCIPALS

This tabulation gives in monthly amounts the State-salary schedules during 1950-1951 for the majority of teachers and for many classified principals. No data are shown for vocational teachers, building principals or superintendents. Supplements paid by local units are not included; see page 153 for average salaries paid during the year.

The teachers' schedule (A) is based upon years of training, which determine the type of certificate held, and years of teaching experience. Payment was for nine (9) months. A Master's degree is one requirement for Graduate certificate.

The principals' schedule (B) is based upon size of school and number of years served as principal. There is an increase in the principal's pay for every additional teacher—from 7 to 50; not all steps in the schedule are shown but a sufficient number to indicate the trend. Principals were paid for ten (10) months. A Master's degree is required for the highest three ratings—P-6 to P-8, inclusive.

TABLE XVII. SALARY SCHEDULE FOR SUPERINTENDENTS

The salary schedule for superintendents—shown below for work of 12 months—is based upon size of administrative unit (membership) and years of experience as superintendent. Supplements paid locally are not included. S-0 is ten percent below S-4 by legislative enactment.

For average salaries, including supplements, see Table VIII of Section II.

TABLE XVIII. INSTRUCTIONAL AND SUPERVISORY PERSONNEL

This table gives for each administrative unit of the State during 1950-1951 a distribution of instructional and supervisory personnel—employed from all sources of funds—by race and levels of instruction. Teachers, as distinguished from principals and supervisors, are also divided by sex. Where fractions appear, teachers are working in both elementary and secondary fields or teaching and supervising.

The summary shows for North Carolina the number of teachers in elementary schools (grades 1-8), the number in high schools (grades 9-12), the number of vocational teachers, of principals, of supervisors, of clerical assistants and of superintendents; then relates the number of teachers to average daily membership and average daily attendance, as given in Table I.

TABLE XIX. ADMINISTRATIVE ORGANIZATION OF SCHOOLS

This table shows for each county of the State during 1950-1951: the number of members of Boards of Education, the number of administrative or supervisory districts, the number of districts levying tax for bonds, the number of district committee-men, the number of city administrative units and somewhat similar information for the cities.

TABLE XX. NUMBER OF ELEMENTARY SCHOOLS  
TAUGHT—BY SIZE

This table shows by race for each county and city system of the State during 1950-1951 the number of elementary schools taught—distributed by size (number of teachers and principals employed).

An 8th grade housed with the high school is not counted as elementary school, but two grades (7th and 8th) as part of junior high school are considered an elementary (grammar) school in this enumeration.

The summary gives the North Carolina total for each race with division between counties and cities. There also appears the number of union schools: those giving two levels of instruction in same building.

TABLE XXI. NUMBER OF HIGH SCHOOLS TAUGHT—BY SIZE

This table shows by race for each county and city system of the State during 1950-1951 the number of high schools taught—distributed by size (number of teachers and principals employed).

The 9th grade of junior high is deemed a high school in this counting.

The summary gives the North Carolina total for each race, with division between county and city units. There is also shown the number of union schools: those offering two levels of instruction in same building.

TABLE XXII. NUMBER OF SCHOOLS TAUGHT—BY GRADE LEVEL

This summary shows by race for 1950-1951 the number of schools which attempted various grade-levels of instruction. For elementary (grades 1-8) there are three types of schools: primary, grammar and other. Primary schools are defined as those which go no higher than grade 5, beginning with the first grade; grammar schools teach only the intermediate grades, as 4-6, 6-8 or 7-8; the other schools cover grades 1-6, 1-7 or 1-8.

For secondary schools the grouping is by years of instruction above eighth. One-year high schools teach only 9th grade, two-year high schools have grades 9-10, etc. A junior high school of grades 7-9 is considered here as a grammar school (grades 7-8) and a one-year high school.

TABLE XXIV. COMPARISON OF NORTH CAROLINA SCHOOLS WITH NATIONAL AVERAGE

This compilation—a summary of many comparisons—gives for several items at two-year intervals the national average for North Carolina and the relative position of North Carolina among forty-nine areas (48 states plus District of Columbia, the latter being included in all national totals). The items shown are objective and in their respective fields may be a measure of accomplishment.

The chief source of data is "Statistics of State School Systems" published by U. S. Office of Education.

This summary gives by race for all school systems of the State during 1950-1951: the number of libraries in elementary and high schools, the total number of school libraries, the number of volumes in those libraries, their estimated value, the amount expended for library maintenance (current expense) and for purchase of new books (capital outlay).

At the bottom of page is a comparison of the number of books in school libraries at intervals since 1930. Data for the last 5 years are given.

\* The apparent decrease for cities was due to change of territory for administrative purposes. In 1932-1933 there were 93 cities and towns operating as units of administration; in 1933-1934 these were reduced to 67, the 26 smaller towns being transferred to county systems.

TABLE XXVI. SCHOOL PROPERTY OWNED

This table gives by race for each county and city administrative unit in the State during 1950-1951: the estimated value of school property, the number of schoolhouses owned, the average value of each, the total number of classrooms and the average number of classrooms per school.

The summary gives several details of valuation for all (172) school systems and relates these values to the number of schoolhouses, to classrooms, to teachers and to pupils.

TABLE VIII. EXPENDITURES FOR GENERAL CONTROL

This summary shows administrative expense (except State) in all administrative units of North Carolina public schools during 1950-1951. For cost of State administration, see last table of Section III.

The amounts paid superintendents (codes 611 and 644\*), clerical assistants (codes 613 and 627-1) and attendance officers (code 617-1) are reduced to average annual basis; Table XVIII of Section I gives the number of people employed except for attendance officers.

A separation of administrative costs between races, also shown, was made by prorating average daily membership in each unit.

## TABLES IX AND X. EXPENDITURES FOR INSTRUCTIONAL SERVICE

These two tables give by race for each county and city school system of the State during 1950-1951: the amount of salaries paid teachers separately in elementary and secondary schools; the amount paid principals and supervisors combined; the cost of supplies, of textbooks (free to pupils) in elementary schools, of vocational education and of all other items of instructional service. Table IX is devoted to costs of instruction in elementary schools (grades 1-8); Table X gives data for instructional costs in secondary schools (grades 9-12).

Contingency salaries applicable to some 1949-1950 personnel are included because they were paid in 1950-1951.

The summary (this page) reduces the amount of salaries to an average for the year. Since travel and other expense are included in the cost of vocational education, that figure for salaries is slightly excessive.

TABLE XVIII. CITY TAX RATES

This table shows for 72 cities of the State—those operating as school administrative units, arranged alphabetically by counties—the property tax rates levied during 1950-1951 for schools, for other-than-school purposes and for all purposes; then gives the proportion which went to schools. Taxes levied by counties are additional; see preceding table.

At the bottom of second page is an unweighted average of these city tax rates for several years—since 1934-1935.

† Calculations have shown that the difference between an unweighted average, as shown here, and a weighted average—which takes valuations into consideration—is not large enough for significance.

TABLE XIX. SUPPLEMENTARY SCHOOL TAXES

This tabulation gives a summary of taxes levied for supplementary purposes during 1950-1951. While Table XVII shows 97 counties levying a tax for Current Expense, most of these made the levy for maintenance and fixed charges—objects not supported by the State—rather than for supplementary purposes. Three (3) counties, as shown below, had voted a supplementary tax: New Hanover, Scotland, and Cabarrus (chronological order). The fifty-nine (59) cities which had voted a supplement may be found on preceding table.

The districts within counties which had a supplementary tax in 1950-1951 are listed below along with rates levied.
